Description:

Little Movers – Children’s Physical Rehabilitation & Development

Little Movers is a caring space dedicated to movement, confidence, and healthy development for children. Led by Anna, a specialist in pediatric physical rehabilitation, we support children in strengthening their bodies, mastering essential motor skills, and feeling confident in every movement they make.

We focus on:

- **Motor Delays in Infants:** rolling over, sitting, crawling, standing, walking, fine motor skills, torticollis
- **Orthopedic Challenges:** posture issues, scoliosis, pelvic tilt, toe walking, knock knees & flat feet
- **Neurological Support:** cerebral palsy (CP), spinal muscular atrophy (SMA), hypotonia, hypertonia
- **Athletic Conditioning:** injury prevention & rehab, muscle strength, coordination, speed

Our Approach:

Sessions are conducted in a comfortable, engaging, and play-based environment, always tailored to the child’s age and individual needs. We use modern, evidence-based methods to help children move freely, grow stronger, and develop in a balanced and harmonious way.

Little Movers – small steps toward big achievements
